# Mustang Outruns the Competition

Mustang is stronger and more abrasion resistant even though it is not heavier.

Dimensional stability is important. Mustang is much better.

Most people think Aqualon is waterproof when it actually has poorer water resistance than Mustang.

TYPICAL PROPERTIES	MUSTANG	HARBOR TIME	AQUALON
Tear Strength (lb/in)	30 x 29	30 x 25	24 x 20
3 Drop Rating	33+ in	20 in	20 in
Relative Abrasion Resistance	3.0	1.2	1.0
Stretch (%)	0 x 0	1 x 1	2 x 2
Weight (oz/yd <sup>2</sup> )	9	10	9
Polymer Based Coating	Acrylic	Acrylic	Vinyl
Reversible	Yes	Maybe	No

Specifications are a combination of manufacturers' published specification and MarChemCFI testing

Finish on Harbor Time is inconsistent.

Vinyl coatings tend to crack and delaminate with exposure to weather. It just doesn't last as long.
